yashshvi-gogia-001696238

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 3 years of hands-on experience in Node.js, React.js, and scalable web application development. Skilled in REST API design, third-party API integrations (Stripe, Twilio, SendGrid), and database optimization. Known for building intuitive user experiences, ensuring API security, and delivering projects on time. Passionate about turning ideas into real-world solutions and committed to writing clean, maintainable, and high-performance code. Adept at collaborating directly with clients and mentoring junior developers.

EDUCATION

Master of Computer Applications
Chandigarh University | 2023-2025

Bachelor of Computer Applications
TIMT, Yamunanagar | 2020-2023

ACCOMPLISHMENTS

- **Best Project Demo Award –** Received company recognition for delivering an exceptional project demonstration, highlighting both technical depth and user-focused design.
- **Quarterly Performance Award –** Selected as one of the top-performing employees for consistent, high-quality contributions to project success.
- **Silent Contributor Award –** Received award for consistently delivering quality work on time and taking ownership of responsibilities.

LANGUAGES KNOWN

- English
- Hindi

SOFT SKILLS

- Problem-solving & debugging
- Team collaboration
- Pressure Resilience
- Clear Articulation

SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS, JavaScript (ES6+), TypeScript
- **Backend:** Node.js, Express.js, REST API Development, Authentication & Authorization (JWT, OAuth)
- **Databases:** MySQL, PostgreSQL, MongoDB
- **APIs & Integrations:** Stripe, Twilio, SendGrid, Third-party API integration
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, AWS (EC2, S3)
- **AI Tools:** Claude AI, GitHub Copilot, ChatGPT

WORK EXPERIENCE

Software Engineer

GiniLytics IT Solutions | August 2025-Present

- Directly coordinated with clients from requirements gathering to successful delivery of solutions.
- Collaborated with cross-functional teams to deliver scalable web applications while maintaining code quality and best practices.
- Designed and implemented scalable web applications, improving performance and maintainability.
- Developed REST APIs and integrated third-party services, including Stripe, Twilio, and SendGrid.
- Guided and mentored junior developers in setting up and configuring projects effectively.

Jr. Software Engineer

GiniLytics IT Solutions | August 2023-July 2025

- Collaborated with senior engineers and QA teams to deliver high-quality software solutions as per client requirements.
- Created project roadmaps and scope documents to ensure clear planning and smooth execution.
- Designed and optimized database schemas and table structures for web applications.

Software Trainee

GiniLytics IT Solutions | February 2023-July 2023

- Successfully completed software engineering training focused on MERN Stack development, gaining hands-on experience in frontend, backend, and database technologies.

PROJECTS

1. CoApp 2.0 | Campaign Management Platform

Role: Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, PostgreSQL

A campaign management platform that enables different organizations to create, manage, and analyze targeted marketing campaigns.

Key Responsibilities:

- Developed full-stack features for campaign creation, editing, and lifecycle management.
- Built RESTful APIs and integrated PostgreSQL for campaign data processing and analytics.
- Implemented advanced search and filtering capabilities to improve campaign discovery.
- Designed responsive user interfaces for campaign monitoring and management.

2. CxPush | Customer Feedback & Survey Platform

Role: Frontend Developer

Tech Stack: React.js, NestJS, PostgreSQL

A survey management platform that helps organizations collect customer feedback and analyze responses in real time.

Key Responsibilities:

- Developed and maintained survey creation and response management modules.
- Built a drag-and-drop survey builder for customizable surveys.
- Implemented multilingual localization support for global users.
- Designed responsive interfaces for survey creation and participation.

3. Onehaircut | Salon Booking Platform

Role: Full Stack Developer (Independent Contributor)

Tech Stack: Next.js, Node.js, Express.js, MySQL, Stripe, Twilio

A salon marketplace that connects customers with professionals for service bookings and appointment management.

Key Responsibilities:

- Independently developed end-to-end features across customer and professional workflows.
- Integrated Stripe payment gateway for secure online payments.
- Implemented Twilio-based SMS notifications and appointment reminders.
- Developed booking management, profile management, and appointment tracking modules.
- Added multilingual support and improved overall user experience.

4. HR Portal | Human Resource Management System

Role: Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, MySQL

A centralized HR management platform for employee, attendance, leave, and project tracking.

Key Responsibilities:

- Developed dashboards for HR teams and managers.
- Implemented attendance tracking and leave approval workflows.
- Built DSR reporting and automated email notification systems.
- Developed employee project assignment and performance tracking features.
- Designed secure APIs and optimized database structures.
